

Backend developer (m/w/d)

We are a remote-first, early-stage AI start-up based in Cologne, Germany. Using our award-winning, proprietary AI technology, our insight engine increases the efficiency and productivity of knowledge workers and saves up to 29% of precious work time! The *AI Concierge* connects all internal data sources, understands what employees are working on, and shows them a comprehensive overview of relevant internal information for their current tasks. Sounds interesting? Then read on!

Who are we looking for?

We are looking for an experienced NodeJS developer to support our development team.

What will be your responsibilities?

We are still growing so you get to define your job along with us! Here are some things we already know that we need your help with now:

- To extend/revise our on-premises API
- To split parts of the API into independent APIs
- To extend our dockerized API in the cloud

What's in your toolbox?

- 3+ years of experience as a software developer or strong coding skills
- Proficient in Node.js / TypeScript development
- Docker / microservice architecture
- Express, REST / (GraphQL is a plus)
- ORM
- RabbitMQ
- Demonstrated attention to detail
- Fluency in English

Ideally you hold a university degree (BA / Master) in computer science or any other relevant subject. You will need effective verbal and written English communication skills to interact with diverse stakeholders. German is a plus.

What we offer! We have a ready-to-go application (scalable & maintainable) with proven demand. You will find a startup with the vision to revolutionize how professionals work and collaborate. Work with our experienced advisors! Already before Covid 19, we focused our startup on being a “remote first” company, offering the freedom of working from where you want to work. The best part is that we have a lot of shares to offer which we would love to talk about when we meet with you. If you're looking for an inspiring startup environment where you have an immense amount of influence, this role is for you!

Interested? Send us a link, a video, a painting or a CV and let us know why you want to join us!
